

BAUM WALL AND ROLL-BY MODELS

Aneroid manometers

The Baum aneroid manometers are the finest and most accurate instruments of their type on the market. The mechanisms are highly refined and thoroughly tried and tested. Attractive, easy to read and coupled with calibrated cuffs, our aneroids will deliver clear and dependable results, time after time.

- Precision low-friction movement and sophisticated twin diaphragm system
- Low-reflection, high contrast scale.
- Clear pointer designed to minimise parallax error.
- Impact-resistant ABS housing
- Accurate to 1% full scale \pm 3mm Hg
- Comprehensive guarantees – see back for details

BAUM WALL AND ROLL-BY MODELS

Aneroid manometers

Wall Aneroid Model (300mm Hg) and Roll-By™ Aneroid Model (300mm Hg)

These aneroid manometers from W.A. Baum are built to agree with our master instruments, which are traceable to the United States National Institute of Standards and Technology. They comply with British Standards and to AAMI SP-9 for accuracy and performance (1% full scale \pm 3mm Hg). Their unique high-contrast scales and red pointers increase visibility and reduce parallax error.

These manometers are manufactured with a high impact ABS plastic manometer housing, precision low-friction movement and twin pre-seasoned phosphor-bronze diaphragm capsules.

The wall aneroid is supplied complete with an adult inflation cuff and bag, bulb and Air-Flo control valve, a white wall basket and a chrome-plated swivel mounting wall bracket.

The Roll-By™ model is as above except the wall bracket is substituted for a strong aluminium trolley, coated white, with five mark-free castor wheels and the manometer is mounted at a 20° angle for ease of viewing. The Roll-By™ is 1m tall and its packed weight is 8kg.

Every Baum Aneroid instrument is guaranteed against defects in workmanship and material for a period of one year from date of purchase. We recommend that every aneroid instrument be checked for accuracy periodically by following our "Testing Instrument Accuracy" procedure to determine if it needs adjustment. Adjustments will be made to Baum aneroid instruments without charge when returned, postage prepaid unless the instrument has been damaged in shipment, tampered with or abused. Our pledge is that our customers will be completely satisfied with our products.

Ordering information

All our products are latex-free.

For product codes with any other cuff size, or special colour cuffs please see our website or call us.

Wall Aneroid

- 0950-00 Wall Aneroid with blue Adult Calibrated V-Lok® cuff and basket
- 0960-00 Wall Aneroid with blue Adult Calibrated V-Lok® cuff, no basket

Roll-By™ Mobile Aneroid

- 1150-00 Mobile Aneroid with blue Adult Calibrated V-Lok® cuff, bulb, valve and large basket
- 1120-00 Mobile Aneroid with blue Adult Calibrated V-Lok® cuff bulb, valve and small basket
- 1140-00 Mobile Aneroid replacement manometer only

Re-usable cuffs

The Baum Cuff is dependable, accurate and easy to use. The inner surface is marked to indicate clearly if the correct size cuff is being used, by showing the limb size range allowed. Genuine Velcro® is used for the fastener to maximize the product's life.

Disposable cuffs for single patient use

As concerns over patient cross-contamination have grown, Baum have produced a hard wearing single-patient cuff from light blue clinical grade PVC available in four sizes.

A separate data sheet for cuffs is available.
